

Attendees: Everyone!

Chair: Ioana

First note taker: Thijs

Started with greetings

Went over the agenda for today

Divided work load for giving feedback on api-specs

Ansen, Vlad and Thijs work on feedback for group C. Petra, Ioana and Hidde work on feedback for group B.

Wrote down feedback and posted it on gitlab. Feedback for group C is 1 issue, while feedback for group B has been done in multiple different issues.

Discuss the buddy check. We came to the consensus that it's somewhat valuable to do it.

Then we received feedback on our work from week 3. We discussed with a TA whether or not we should implement the vendors. TA referred us to Mike, who gave us the feedback

Thijs leaves for different course 🙄
